

CITRUS TERPENE

DESCRIPTION: Citrus Terpene or d-Limonene is a naturally pure oil which is produced from citrus fruit skins by the distillation process.

Nature has produced this oil in living, organic plant material, and therefore, nature has methods in place to accept, reduce, breakdown, absorb and otherwise handle this oil as part of the chemistry of the Earth's living eco system. In other words, d-Limonene is BIODEGRADABLE.

USES: Undiluted Citrus Terpene can replace a wide variety of products including Mineral Turpentine, Acetone and Toluene. It can also be combined with a surfactant to produce household cleaners. It is an ideal thinner for Tung oil, to assist with penetration of the oil into porous surfaces i.e., timber, concrete, mud brick, slate, terracotta etc. It is an effective cleaner and will dissolve grease, remove stains i.e. lipstick, wax, printers ink, glue chewing gum, crayons, bitumen and many other "stubborn" to remove substances - even if those substances were derived from petroleum sources. Citrus Terpene has greater "cutting" power than mineral Turpentine and can be used as an alternative whenever the use of Turpentine is called for.

It also the ideal solvent to thin pure Tung Oil, for application to timber and masonry surfaces. Refer to the Tung Oil data sheet for full particulars.

SIZES: 1 and 4 Litre

SAFETY: Citrus Terpene (d-Limonene) is classified as a medium aromatic hydrocarbon solvent with medium flashpoint. It is a **POISON** even though it is a natural product. It should be treated the same as any other solvent or Turpentine product. Citrus Terpene (d-Limonene) has a flashpoint of 46 degrees C. It is classed as **FLAMMABLE**

CAUTION

- Keep away from sparks, open flames or any ignition source
- Use in a well ventilated area
- Wear gloves, protective clothing & safety glasses
- Use respiration equipment if in a confined area
- Store with lid tightly closed in a dark, cool ventilated area
- Dispose of containers in an approved manner
- Do not discharge into waterways
- **As with any Turpentine wash rags used in hot soapy water after use, rinse then hang to dry as they may self ignite.**

KEEP OUT OF THE REACH OF CHILDREN

Notice to user: Since methods and conditions are beyond our control, Organoil™ does NOT accept any liability for any deficiency resulting from the use of this product.
